

Francisco Zambrano PhD

- ▶ Providencia, Santiago, Chile
- ▶ Chilean-Italian

Skills

Programming (Python/R/Matlab)	10+ yrs.
ML/DL (Python/R)	5+ yrs.
CI/CD	5 yrs.
Google Earth Engine	3 yrs.
Amazon Web Service (AWS EC2)	3 yrs.
Dockers	3 yrs.
Reproducibility (Rmarkdown/Quarto)	6 yrs.
Prototyping (R-Shiny/Pyrhon-Streamlit)	5 yrs.

Software

- ▶ Git
- ▶ RStudio - Positron
- ▶ VS Code
- ▶ Terminal
- ▶ QGIS
- ▶ SAGA

Spatial data

- ▶ MODIS
- ▶ ERA5/ERA5-Land
- ▶ CHIRPS
- ▶ Sentinel-1/2
- ▶ Landsat 7/8/9
- ▶ SoilGrid

Summary

Senior Geospatial Data Scientist with 15+ years in remote sensing and spatial analysis for climate change, agriculture, and water resources. Led ANID-funded projects totaling >600M CLP, developing national platforms (ODES-Chile, SatOri) for drought monitoring and irrigation optimization. Expertise in Python, R, GIS, and ML to drive data-driven decisions in AgTech and climate risk. Seeking industry roles to apply academic insights to scalable solutions.

Experience

Senior Geospatial Scientist & Project Lead

Feb 2018 - Aug 2025

Earth Observation Center
Hemera - Universidad Mayor

- Built and launched ODES-Chile (<https://odes-chile.org>) - national drought observatory & early-warning system processing ERA5-Land, MODIS, CHIRPS at country scale (1,000-10,000 monthly users including Ministry of Agriculture).
- Designed and deployed SatOri (<https://s4tori.cl>) - operational satellite irrigation optimization platform for cherry orchards using Sentinel-2 + meteorological data + ML to predict stem water potential and deliver irrigation recommendations.
- Developed and released national PM2.5 forecasting dashboard (2025) combining SINCA stations + satellite aerosol data + ML (https://frzambra.shinyapps.io/app_pm25).
- Secured and directed 600M CLP (US\$650k) in competitive grants as Principal Investigator.
- Published lead-author papers in Remote Sensing of Environment, Agricultural Water Management, Earth's Future

Visiting Doctoral Researcher

Sep - Dec 2016

Faculty of Geo-Information Science and Earth Observation (ITC)
University of Twente, Enschede, The Netherlands

- Built agricultural productivity decline models using MODIS/CHIRPS time-series and spatial analytics; published in Remote Sensing of Environment (impact: policy-relevant for Chilean drought mitigation).

Visiting Doctoral Researcher

Jan-Jun 2016

CALMIT/NDMC
University of Nebraska, United States

- Evaluated satellite precipitation products for drought monitoring; results in Atmospheric Research, informing national agroclimate reports.

Education

03/2014 - 09/2017

Ph.D in Agricultural Engineering, Mention in Water Resources

Universidad de Concepción

Thesis: Agricultural Drought in Chile: From Assessment to Prediction Using Satellite Data

03/2000 - 09/2007

Civil Engineering

Universidad de Concepción
